

## WHY GTM?

Galway Tool & Mould design and manufacture outstandingly precise, high-performance, cost-effective injection moulds. We bring your concept through to complex injection mould solutions.

At GTM, we are known for working closely with our customers on their core ideas and generating feasible, innovative concepts. We offer a complete turnkey solution for our customers, from initial component design through to final testing & validating.

Our services include; Product Design & Development, Manufacture of Prototype & Pilot Moulds, Manufacture of High-Precision Production Moulds, In-House Mould Trial & Validation Centre, and In-House Metrology Capabilities.

We maximise production capacities with 'lights out' manufacturing and we are continuously investing in state-of-the-art machinery and facilities to meet all of our customers' requirements.

Through our In-house capabilities we keep your project on time, on specification, and on budget.

# REPAIR & MAINTENANCE

One of our key advantages is that all of the repair process from the welding to the re-machining to the inspection are all done on site

## KEY BENEFITS:

- Guaranteed repeatable spares
- Full mould repair and refurbishment service
- Complete onsite capabilities
- Scheduled tool servicing and PPM programs
- Third party tool servicing and PPM programs
- Laser welding centre with latest technology machines

## LASER WELDING CENTRE:

- Micro welding accuracy
- Excellent depth to width ratio
- Limited heat affected area
- No physical contact between the steel and laser head
- No annealing of the surround area in the steel
- Hygienic compared to traditional methods
